## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/US04/38945**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>1-13</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-13</u>	NO
Industrial Applicability (IA)	Claims <u>1-13</u>	YES
	Claims <u>NONE</u>	NO

**2. CITATIONS AND EXPLANATIONS**

Claims 1-13 lack an inventive step under PCT Article 33(3) as being obvious over the combined teachings of Hudson (US 5,704,961) and Hewett et al (US 5,416,061).

Hudson teaches fertilizer compositions comprising corrosion inhibitors and nitrate compounds. The compositions may further comprise pesticidal components for agricultural application (columns 1-2).

Hewett et al teach herbicidal compositions comprising a triketone herbicide in combination with additional active agents such as mesotrione (column 1, lines 55-56). Corrosion inhibitors may also be added to the compositions (column 18, lines 1-7).

Thus it would have been prima facie obvious to the ordinary artisan at the time the invention was made to have combined nitrate salts with pesticidal components in a corrosion inhibiting composition because Hudson teaches such compositions, and Hewett discloses mesotrione as being useful in combination with a corrosion inhibitor.

Claims 1-13 meet the criteria set out in PCT Article 33(4), and thus possess industrial applicability because the subject matter claimed can be made or used in industry.
